

Can I mount 44AA or 44AB mouth simulators inside the KEMAR head?

No, 44AA and 44AB mouth simulators won't fit inside a KEMAR Head. The KEMAR's mouth simulator has a smaller housing, custom made to fit the small cavity inside the KEMAR head. It also requires custom fitting to ensure proper sealing between the mouth simulator and the KEMAR lips.

A 45BC KEMAR has an audio amplifier for the mouth simulator, located inside the torso. Therefore, if a KEMAR with mouth simulator is used without its torso, an external audio amplifier will be needed.

Figure 1. 44AA/AB mouth simulator CAN'T fit inside a GRAS 45BC KEMAR's head.
