GRAS 40AQ 1/2" Prepolarized Random Incidence Microphone

Freq range: 3.15 Hz to 12.5 kHz Dyn range: 16 dB(A) to 148 dB Sensitivity: 50 mV/Pa The 40AQ is an IEC 61094 WS2P/D ½" prepolarized random-incidence microphone with rear-venting. It is a high-precision condenser microphone made according to IEC 61094-4 requirements, optimized to measure sound correctly in random, diffuse, and reverberant sound fields. It is extremely robust and reliable and can measure sound pressure levels up to 148 dB in the range of 3.15 Hz to 16 kHz.

Technology

Introduction

The 40AQ is an IEC 61094 WS2P/D ½" prepolarized random-incidence microphone with rear-venting. Read about the externally polarized equivalent <u>40AR</u>.

It is a high-precision condenser microphone made according to IEC 61094-4 requirements, optimized to measure sound correctly in random, diffuse, and reverberant sound fields. It is extremely robust and reliable and can measure sound pressure levels up to 148 dB in the range of 3.15 Hz to 16 kHz.

40AQ is individually factory-calibrated and delivered with a calibration chart stating its specific opencircuit sensitivity and pressure frequency response.

Typical applications and use

The 40AQ is optimized to measure sound levels correctly in random (diffuse) sound fields. e.g. caused by multiple sound sources or hard reverberant surfaces. Random incidence microphones are used e.g. inside vehicles.

40AQ is included in the GRAS<u>46AQ</u> Randomincidence microphone set.

Compatibility

The 40AQ requires a standardized 1/2" or 1/4" CCP preamplifier and an input module that supports this technology with a BNC, SMB, or Microdot connector.

System verification

For daily verification and check of your measurement setup, we recommend using a calibrator like GRAS <u>42AG Multifunction Sound Level</u> <u>Calibrator</u>.

For proper sensitivity calibration, we recommend using a pistonphone like GRAS Intelligent Pistonphone <u>42AP</u>.

Calibration

When leaving the factory, all GRAS microphones have been calibrated in a controlled laboratory environment using traceable calibration equipment. Depending on the use, measurement environment and internal quality control programs we recommend that the microphone is recalibrated at least once a year.

We offer two kinds of calibration as an optional after-sales service: GRAS Traceable Calibration and GRAS Accredited Calibration.

GRAS Traceable Calibration is a traceable calibration performed by trained personnel under controlled conditions according to established procedures and standards. This is identical to the rigorous calibration that all GRAS microphones are subjected to as an integral part of our quality assurance.

GRAS Accredited Calibration is performed by the GRAS Accredited Calibration Laboratory that has been accredited in accordance with ISO 17025 by DANAK, the Danish Accreditation Fund.

If you want a new microphone set delivered with an accredited calibration in stead of the default factory calibration, specify this when ordering.

Quality and warranty

All GRAS microphones are made of high-quality materials that will ensure life-long stability and robustness. The microphones are all assembled in verified clean-room environments by skilled and dedicated operators with many years of expertise in this field.

The microphone diaphragm, body, and improved protection grid are made of high-grade stainless steel, which makes the microphone resistant to

Technology

physical damage, as well as corrosion caused by aggressive air or gasses.

This, combined with the reinforced gold-plated microphone terminal which guarantees a highly reliable connection, enables GRAS to offer 5 years warranty against defective materials and workmanship.

Service

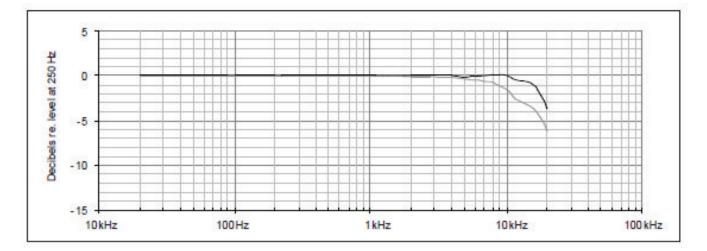

If you accidentally damage the diaphragm on a GRAS microphone, we can—in most cases—replace it at a very reasonable cost and with a short turnaround time. This not only protects your investment, but also pleases your quality assurance department because you don't have to worry about new serial numbers, etc.

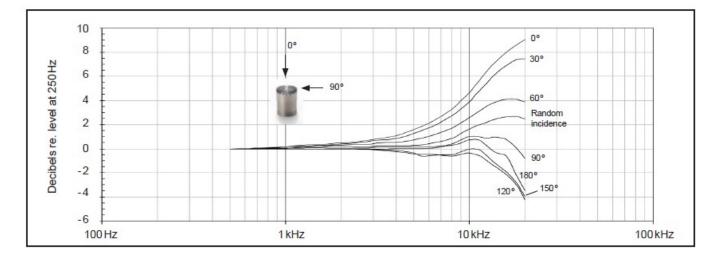

Specifications

| Polarization/Connection | | 0 V / CCP |
|---|---------------|-------------------------|
| Frequency range (±1 dB) | Hz | 12.5 to 8 k |
| Frequency range (±2 dB) | Hz | 3.15 to 12.5 k |
| Frequency range (±3 dB) | Hz | 3.15 to 16 k |
| Dynamic range lower limit (microphone thermal noise) | dB(A) | 16 |
| Dynamic range lower limit with GRAS preamplifier | dB(A) | 18 |
| Dynamic range upper limit | dB | 148 |
| Dynamic range upper limit with GRAS preamplifier @ +28 V / ±14 V power supply | dB | 142 |
| Dynamic range upper limit with GRAS preamplifier @ +120 V / ± 60 V power supply | dB | 148 |
| Dynamic range upper limit with GRAS CCP preamplifier | dB | 138 |
| Open-circuit sensitivity @ 250 Hz (±2 dB) | mV/Pa | 50 |
| Open-circuit sensitivity @ 250 Hz (±2 dB) | dB re 1V/Pa | -26 |
| Resonance frequency | kHz | 14 |
| Microphone cartridge capacitance, typ. | pF | 13 |
| Microphone venting | | Rear |
| IEC 61094-4 Designation | | WS2D |
| Temperature range, operation | °C / °F | -40 to 120 / -40 to 248 |
| Temperature range, storage | °C / °F | -40 to 85 / -40 to 185 |
| Temperature coefficient @250 Hz | dB/°C / dB/°F | -0.01/-0.006 |
| Humidity range non condensing | % RH | 0 to 90 |
| Humidity coefficient @250 Hz | dB/% RH | -0,001 |
| Static pressure coefficient @250 Hz | dB/kPa | -0,011 |
| Influence of axial vibration @1 m/s² | dB re 20 µPa | 62 |
| CE/RoHS compliant/WEEE registered | | Yes / Yes, Yes |
| Weight | g / oz | 6.5 / 0.229 |

Typical frequency response. Upper curve shows response in a diffuse sound field (random incidence), lower curve shows pressure response.

About GRAS Sound & Vibration

GRAS is a worldwide leader in the sound and vibration industry. We develop and manufacture state-of-the-art measurement microphones and related equipment for industries where acoustic measuring accuracy and repeatability are of the utmost importance. This includes applications and solutions for customers within the fields of aerospace, automotive, audiology, consumer electronics and other highly demanding industries. GRAS microphones are designed to live up to the high quality, durability and accuracy that our customers have come to expect, trust and require. GRAS Sound & Vibration is represented through subsidiaries and distributors in more than 40 countries and is part of Axiometrix Solutions, a leading test solutions provider comprised of globally recognized measurement brands.
